Summary

Full-Stack Software Engineer experienced in building scalable web applications using C#/.NET, Go, and modern frontend technologies. Skilled in designing RESTful APIs, optimizing databases, and developing responsive user experiences. Currently expanding expertise in AI application development by integrating Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), vector databases, and AI APIs into production-ready software.

Work Experience

APPLICATION DEVELOPER INTERN

Asuransi Astra Buana

March 2025 - February 2026

- Developed and deployed responsive UI components and RESTful APIs using C# and .NET Framework, ensuring alignment with specific user requirements.
- Enhanced backend services and optimized business logic to maintain high-performance standards for critical user-facing features.
- Designed database tables and engineered SQL queries and Stored Procedures to improve data integrity and retrieval speed
- Partnered with QA teams and stakeholders to troubleshoot technical issues and deliver software solutions within project timelines

Personal Projects

Nao | Next.js, TypeScript, FastAPI | [Github Link](#)

- Developing an AI-powered knowledge assistant that answers questions using Retrieval-Augmented Generation (RAG)
- Developing RESTful APIs with FastAPI and integrated semantic document retrieval to improve response accuracy.
- Implementing document ingestion, embedding, and retrieval pipelines using vector storage for efficient knowledge search.

TuFind Backend | Go, Gin, GORM | [Github Link](#)

- Developed a tutor-student matching platform backend using Go and the Gin framework, focusing on high-performance API delivery
- Implemented secure JWT-based authentication and middleware for role-based access control between students and tutors.
- Optimized data persistence using GORM and MySQL, designing relational schemas to handle complex matching queries

OmniKasir | Next.js, TypeScript | [Github Link](#)

- Built an omnichannel Point of Sale (POS) system using Next.js and TypeScript to synchronize offline and online retail transactions
- Engineered a real-time inventory management system and sales reporting dashboard using Prisma ORM for type-safe database queries.
- Designed a scalable full-stack architecture tailored for UMKM, ensuring low-latency response times during peak transaction periods

Educational

BACHELOR OF COMPUTER SCIENCE

Binus University

2022-2026 | GPA: 3.87/4.00

Skills

- **Languages:** C#, Go, Java, TypeScript, Python, SQL
- **Frontend:** React, Next.js, HTML, CSS, Tailwind CSS, React Native
- **Backend:** ASP.NET Core, .NetFramework, Gin, FastAPI, Node.js
- **Database:** SQL Server, PostgreSQL, MySQL, GORM, Prisma
- **Cloud & DevOps :** Git, Docker, GitHub Actions, Google Cloud Run, Render, Supabase
- **AI :** Gemini API, RAG, Vector Databases, Prompt Engineering
